**ABSTRACT**

A lavatory for an aircraft cabin includes a wall having a  
forward wall portion disposed immediately aft of and sub-  
stantially conforming to an exterior aft surface of an aircraft  
cabin structure, such as a passenger seat, that is substantially  
not flat in a vertical plane. The forward wall portion includes  
a forward projection over an aft portion of the adjacent  
passenger seat. The forward wall portion can define a  
secondary space in the interior lavatory space, which can  
provide an amenity stowage space, and can include design  
elements providing visual space.
